

The First-Class Ticket to Preserving Parenthood

About ReproTech

For 30+ years, ReproTech has set the benchmark for safety in long-term reproductive cryostorage. The following safety features are standard at all five ReproTech facilities:

24/7
state-of-
the-art
monitoring
systems.

All specimen
tanks enclosed
in Disaster-Proof
Safe Storage
Rooms.

Backup empty
storage tanks
kept cold &
ready, just in
case.

Each location
has a large
supply of bulk
nitrogen onsite.

How to Order an OverNite Male™ Kit

To order, scan the QR code or visit reprotech.com/overnite-male.

- **Cost:** the first kit is \$575 and includes its delivery to you, return to the lab, processing, transfer, and first year of storage with ReproTech. Additional kits are \$350.
- Visit storagefees.com for our current storage fee schedule.

About the OverNite Male™ Kit

The OverNite Male™ Kit was developed in 1994 by Gail S. Prins, Ph.D. at the University of Illinois at Chicago (UIC) Andrology Lab. All kits are processed there, then sent to ReproTech for long-term cryostorage. The UIC Andrology Lab and ReproTech are committed to providing affordable fertility preservation.

Testing

The following infectious disease testing results should be submitted for tissue banking:

- HIV 1 & 2
- Hepatitis B Surface Antigen
- Hepatitis C Antibody

If you fail to provide at least HIV 1 & 2 testing results—you will pay higher potentially infectious storage fees.

Specimen Collection

- Depending on the amount of time you have or your sperm quality, you may use one kit or multiple kits.
- If you're using multiple kits, allow 3–5 days of sexual abstinence between collections, but no more than 6 days.

Specimen Preservation Process

1. Upon receipt, the UIC Lab performs a semen analysis to give you information about the quality of your sperm cells.
2. A cryobuffer is added during the cryopreservation process to protect the sperm.
3. The sperm are frozen and stored in liquid nitrogen tanks at -196°C (-321°F).
4. Specimens are transferred from UIC to ReproTech for long-term storage.
