

Experience Matters. Unmatched Safety & Service.

ReproTech has become the nationwide leader in storing human reproductive specimens with over 34 years of experience. Our System Design, Proven Processes, and Multi-Layer Monitoring and Redundancies keep specimens safe.

Choosing to move your patients' specimens to offsite storage is a big decision, so rest assured that we are ready to help. **ReproTech provides:**

- Extensive expertise in assisting IVF centers to streamline the specimen transfer process. We work with large hospital and university programs, private fertility centers, and physician-run practices.
- Onboarding Program for your lab and clinical staff to help you succeed in implementing ReproTech services.
- Dedicated ReproTech staff who can help you, onsite or remotely, to organize and move existing inventory to our long-term storage facilities.

Free Up Space & Reduce Liability

Our signature Auto Transfer Management (ATM) Program offers a convenient, streamlined experience for transferring specimens from non-cycling patients to offsite, long-term storage.

[Here's an overview:](#)

- Patients "pre-consent" with ReproTech at the same time they complete your IVF or cryopreservation consents using our easy account sign-up process through DocuSign.
- You keep specimens onsite at your clinic for 6 or 12 months, after which they are automatically transferred to ReproTech for long-term storage.
- Your patients will appreciate our economical storage fees, which make it affordable for them to store their specimens until they're ready to resume treatment at your clinic.
- Patients enjoy free shipping or local transports when you partner with ReproTech for long-term storage!

Extensive Experience in Specimen Handling

- ReproTech has safely stored thousands and thousands of human specimens for 34+ years.
- Our safe cryostorage processes and protocols have been developed over many years and are routinely tested and updated.
- We ensure our Cryostorage Specialists have extensive training in handling vitrified specimens. Our experts safely ship and receive hundreds of patient specimens weekly.

We are Safety Obsessed

Disaster-Proof Safe Storage Rooms

Hurricane, Tornado, & Wildfire-proof

Multi-Layer Monitoring & Redundant Systems

Internal & external temperature monitoring
Redundant alert, power, communication & information systems

ReproTech Guardian: Our Proprietary Tank Monitoring Application

Comprehensive monitoring of tank health on one screen
Tracks and trends tank health in real-time
Enables predictive analysis

Transportation

Local Hand-Carried Transport + UPS Premier Healthcare Shipping

- Local pickups and deliveries by ReproTech staff ensure the safest method of transport.
- ReproTech vans are retrofitted with custom storage framework to ensure secure transport of tanks.
- Shipments are sent via UPS Premier Healthcare – a critical healthcare-level service with priority handling.
- ReproTech GPS Trackers included with every shipment for an extra layer of safety surveillance.
- Patients may opt to purchase our Shipping Liability Protection for a low fee.
